

3). **Protecting buildings and occupants from Disease**

This web based seminar provides facility and risk managers with information on how best to defend the building and reduce the risk of infection for visitors and employees.

The short course provides information on:

- How disease is spread
- Routes of infection
- Controlling people access with low cost Infra red thermography
- Controlling HVAC systems and aerosolisation hazards
- Pitfalls of Cleaning regimes
- How to reduce risk from Fomites
- Clear desk routines
- Hot desking issues
- Techniques to kill pathogens and reduce running costs
- Increasing defence levels and reducing annual overall running costs by preventative maintenance systems
- Paying for itself defence
- Reducing normal and pandemic absenteeism
