

Module 1 TERRORIST CBR and explosion response training
Written by Jeff Charlton 08700 789 999

Written by Jeff Charlton

Foreword

This awareness module provides the public and citizen with vital information on basic survival techniques following either warning of imminent attack or post release of Chemical Biological Radiological devices.

The short module identifies:

- Typical early warning signs of CB release
- Routes of infection and defence
- Identifying hazardous areas
- What you can do to avoid exposure
- What you must do to reduce exposure#
- Personal protection
- Personal decontamination
- Decontamination proposals
- Travelling through contaminated zones
- Moving away from danger and wind effects

Objective

To provide the citizen with a basic knowledge of what to expect, how to identify hazards and what to do to minimize risk and exposure following or during a Terrorist CBRNE event .
